## **SUPPLEMENTARY INFORMATION:**

### **I. Abstract**

The NASA Contractor Financial Management Reporting System is the basic financial medium for contractor reporting of estimated and incurred costs, providing essential data for projecting costs and hours to ensure that contractor performance is realistically planned and supported by dollar and labor resources. The data provided by these reports is an integral part of the Agency's accrual accounting and cost based budgeting system. Respondents are reimbursed for associated cost to provide the information, per their negotiated contract price and associated terms of the contract. There are no "total capital and start-up" or "total operation and maintenance and purchase of services" costs associated since NASA policy requires that data reported is generated from the contractors' existing system. The contractors' internal management system shall be relied upon to the maximum extent possible. Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.
